Less than or equal to zero, and Odd. Can you help him create a program that identifies whether either of the integers meets these conditions?

##### ***Input Format***

The input consists of two integers on separate lines, denoted as 'input1' and 'input2'.

##### ***Output Format***

A single line with a boolean result (either 'true' or 'false') indicating whether either 'input1' or 'input2' is both less than or equal to zero and odd.

Refer to the sample output for format specifications

        int input1 = sc.nextInt();  
        int input2 = sc.nextInt();  
  
        boolean result = ((input1 <= 0 && input1 % 2 != 0) ||  
                           (input2 <= 0 && input2 % 2 != 0));
